Preparer note (synthetic):
Form 2441 Part I requires the provider's NAME, ADDRESS and TIN/EIN. The credit is disallowed without them (i2441) — this statement is why the return can claim it. The per-child split matters because the expense cap is PER QUALIFYING PERSON ($3,000 for one, $6,000 for two or more), not per provider, and because the credit is further limited to the LOWER-earning spouse's earned income. Neither cap is on this statement: the provider reports what was paid; the return does the rest.
